

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-5 Cancelled

6. (Currently Amended) A packaging tape system, comprising:
multiple ~~dispensing~~ rolls of adhesive tape having a sufficient length
~~configured to extend across a face of a box and seal two flaps of the box~~
in a closed position; and

indicia repeatedly pre-printed on each roll of the adhesive tape
along the length thereof indicating a single room or location within in a
house or office from which contents of the box originated or are destined
within another house or office;

wherein each roll is of a distinctive color so as to be readily visually
distinguishable from another roll indicating another room or location within
the house or office; and

wherein the box can be sealed and labeled simultaneously without
the marking the box or tape with a writing instrument.

7. (Currently Amended) The system of claim 6, wherein the pre-
printed indicia relating to the single room or location ~~rooms and locations~~ of
the house is selected from: ~~specifies at least one of~~ a bedroom, a bathroom,
a kitchen, a dining room, a living room, a garage, a storage room, an office,
a study, a den, a family room and ~~or~~ a utility room.

8. (Currently Amended) The system of claim 6, wherein the pre-
printed indicia relating to the single room or location ~~rooms and locations~~ of
the office is selected from: ~~specifies at least one of~~ a breakroom, a
conference room, a file room, a reception area, an office, a computer and ~~or~~
a department.

9. (Currently Amended) A process for packaging articles to be moved, comprising the steps of:

- supplying a moving box having opposed open flaps;
- placing articles to be moved into the moving box;
- closing the flaps toward one another; and
- applying adhesive tape over substantially the length of opposing edges of the closed flaps to hold the flaps in a closed position, the adhesive tape having ~~pre-printed~~ indicia repeatedly pre-printed thereon indicating a single room or location from which the articles were taken within a house or office, or where the box of articles is destined within another house or office, whereby the moving box is sealed and labeled simultaneously without the need more marking the tape or the box with a writing instrument.

10. (Currently Amended) The process of claim 9, wherein the pre-printed indicia relating to the single room or location ~~rooms and locations~~ of the house is selected from: ~~specifies at least one of~~ a bedroom, a bathroom, a kitchen, a dining room, a living room, a garage, a storage room, an office, a study, a den, a family room and ~~or~~ a utility room.

11. (Currently Amended) The process of claim 9, wherein the pre-printed indicia relating to the single room or location ~~rooms and locations~~ of the office is selected from: ~~specifies at least one of~~ a breakroom, a conference room, a file room, a reception area, an office, a computer and ~~or~~ a department.

12. Canceled

13. (Currently Amended) The process of claim 9, including the step of providing multiple ~~dispensing~~ rolls of adhesive tape, wherein the adhesive tape of each roll is of a distinctive color so as to be readily visually distinguishable from another roll indicating another room or location of the house or office.

14. (Currently Amended) A process for packaging articles to be moved, comprising the steps of:

supplying a moving box having opposed open flaps;

placing articles to be moved into the moving box;

closing the flaps toward one another;

providing multiple ~~dispensing~~ rolls of adhesive tape each having pre-printed indicia repeatedly thereon for indicating a single room or location from which the articles were taken within a house or office or representing the destination of the box of articles within another house or office, each roll being of a distinctive color so as to be readily visually distinguishable from another roll indicating another room or location of the house or office; and
applying adhesive tape from the dispensing roll indicating the room or location from which the articles within the box were taken over substantially the length of opposing edges of the closed flaps to hold the flaps in a closed position, whereby the moving box is sealed and labeled simultaneously without the need to mark the tape or the box with a writing instrument.

15. (Currently Amended) The process of claim 14, wherein the pre-printed indicia relating to the single room or location ~~rooms and locations~~ of the house is selected from: specifies at least one of a bedroom, a bathroom, a kitchen, a dining room, a living room, a garage, a storage room, an office, a study, a den, a family room and ~~or~~ a utility room.

16. (Currently Amended) The process of claim 14, wherein the pre-printed indicia relating to the single room or location ~~rooms and locations~~ of the office is selected from: specifies at least one of a breakroom, a conference room, a file room, a reception area, an office, a computer and ~~or~~ a department.

17. (Currently Amended) A packaging tape system, comprising:

a ~~dispensing~~ roll of adhesive tape configured to extend across a face of a box and seal two flaps of the box in a closed position; and

indicia repeatedly pre-printed on the adhesive tape indicating a single room or location in a house from which contents of the box originated or are destined within another house, wherein the pre-printed indicia relating to the rooms and locations of the house ~~specifies at least one of~~ is selected from: a bedroom, a bathroom, a kitchen, a dining room, a living room, a garage, a storage room, an office, a study, a den, a family room ~~or~~ and a utility room;

wherein the box can be sealed and labeled simultaneously without marking the box or tape with a writing instrument.

18. (Currently Amended) The system of claim 17, comprising multiple ~~dispensing~~ rolls of adhesive tape, each roll being of a distinctive color so as to be readily visually distinguishable from another roll of adhesive tape for indicating another room or location within the house or office.

19. (Currently Amended) A packaging tape system, comprising:

a ~~dispensing~~ roll of adhesive tape configured to extend across a face of a box and seal two flaps of the box in a closed position; and

indicia repeatedly pre-printed on the adhesive tape indicating single a room or location in an office from which contents of the box originated or are destined within another office, wherein the pre-printed indicia relating to the single room or location within the office is selected from: a breakroom, a conference room, a file room, a reception area, an office, a computer and a department ~~rooms and locations of the house specifies at least one of a bedroom, a bathroom, a kitchen, a dining room, a living room, a garage, a storage room, an office, a study, a den, a family room or a utility room;~~

wherein the box can be sealed and labeled simultaneously without marking the box or tape with a writing instrument.

20. (Currently Amended) The system of claim 19, comprising multiple ~~dispensing~~ rolls of adhesive tape, each roll being of a distinctive color so as to be readily visually distinguishable from another roll of adhesive tape for indicating another room or location within the house or office.

21. (New) A process for packaging articles to be moved from a first house to a second house, comprising the steps of:

providing multiple rolls of adhesive tape each having indicia repeatedly printed on a length thereof indicating a single room or location within the house, selected from: a bedroom, a bathroom, a kitchen, a dining room, a living room, a garage, a storage room, an office, a study, a den, a family room and a utility room, wherein each roll is of a distinctive color so as to be readily visually distinguishable from another roll indicating another room or location within the house ;

supplying at least one moving box having opposed open flaps;

placing articles within a room of the first house to be moved to the second house into the moving box;

closing the flaps of the box toward one another;

selecting the roll of adhesive tape having the single room repeatedly pre-printed thereon representing the room from the which the articles were taken;

applying the adhesive tape from the selected roll over substantially the length of opposing edges of the closed flaps to hold the flaps in a closed position, whereby the moving box is sealed and labeled simultaneously without the need to mark the tape or the box with a writing instrument; and

delivering the at least one sealed and labeled box from the first house to the second house and placing each sealed and labeled box in a corresponding room in the second house according to the indicia on the adhesive tape sealing the box.
